Adult Nurse Practitioner  
Geriatric Nurse Practitioner  
On-Call Nurse Practitioner

#### Specialties:

Neurology/stroke

#### **Personal Interests**

American Academy of Nurse Practitioners  
American Nurses Credentialing Center  
Primary Nurse Practitioner at Barclay Friends

**Evercare is an award-winning care coordination plan** that provides integrated, compassionate health care coverage for aging, vulnerable, and chronically ill people. Through our team of practitioners, we take a holistic approach to care management that helps enrich an enrollee's quality of life and honors their dignity.

## What can you expect from your Evercare practitioner?

Our team of practitioners works closely with physicians, nursing homes and other facilities to monitor and respond to an enrollee's medical, social and emotional needs. Our approach helps enrollees experience a seamless continuum of care that integrates each of their different care providers. What's more, practitioners have advanced training and are qualified to conduct physical exams, prepare treatment plans, manage chronic conditions and order tests.

The Evercare teamwork approach has been shown to help prevent some problems before they become serious. In fact, an independent study of Evercare's nursing home program found that Evercare reduced hospitalizations by 45% with no change in mortality; reduced emergency room visits and trips to the doctor by 50%.\*

Evercare practitioners are the heart of our program and develop one-on-one relationships with enrollees to help them achieve their highest level of health and independence. That trust and rapport helps practitioners to anticipate enrollees' needs, coordinate their care and facilitate open communication with physicians, nursing home staff and family members. Enrollees and their families consistently rate their satisfaction with Evercare at 96% or better.\*\*
